

Exam Instructions for part 1

Read the following carefully and then click the link at content area to proceed to the exam.

Important: don't open two WeBWork windows or tabs at the same time while you're taking the test. It's safe to enter and leave a WeBWork session (pushing the Grade button before leaving, of course).

The exam mode of WeBWork, called Gateway/Quiz/Test, has several differences from the regular homework mode.

- Instead of submitting each answer separately as you enter it, you will enter all of the answers and when you are done with all problem in the test, the you push the "Grade Test" button.
- You may still look ahead, and work the problems in a different order than they are presented in the exam.
- Once you push the "Grade Test" button, the system records your score for the version of the exam you took. After pushing the Grade button you cannot change the score in that specific for the exam.
- When you first open the test, a timer appears that will count down from 120 minutes. WeBWork will start urging you to finish when there are 90 seconds to go. It will stop accepting answers either after you have pushed the "Grade Test" button, or after time has run out.
- Be sure to complete submission by pressing the "Grade Test" button.
- Since the test can be taken up to 120 minutes, you must start the test at least 2 hours prior the closing time of the exam (no later than 2:00 PM).

As usual, enter your numerical answers in the specified format for the problems. Usually the problems guide you to the number of decimal places needed and other format that the answers have to be entered in the system. Be sure read the problems carefully.

The exam opens on Thursday June 25 at 6:00 PM (Eastern) and closes on Friday June 26 at 4:00 PM (Eastern). After closing time, anybody may download a copy of exam received in PDF format.
